Subject: NERL Las Vegas Lab Closure -

Importance: High

Good morning Todd,

In speaking with Robert Andrews (COR – Las Vegas) and Rick Pittman (COR – Athens) yesterday, it has come to light that meetings are occurring this week at the RTP location. The meeting includes various individuals from NERL's Las Vegas, Cincinnati, and Athens labs and is to discuss the many aspects pertaining to the closure of the Las Vegas EPA campus located on the UNLV campus.

I am the Contract Specialist assigned to both the Las Vegas Operations and Maintenance contract and the Athens Operations, Maintenance, and Facilities Support Services contract; Keith Sterns is the Contracting Officer. From what I understand from Robert and Rick there will be a de-scoping and re-scoping of services from the Las Vegas lab to the Athens lab. Keith and I would be more than happy to make ourselves available to meet with the Las Vegas and Athens persons to begin discussions regarding these two contracts and the needs of the labs. Please let me know if you would believe any meetings between RTPPOD would prove to be of value (Keith and I at the least would like to attend a meeting between Rick, Robert, and any other individuals you deem appropriate). I am teleworking today but will be on campus tomorrow and Thursday. I am scheduled to telework Friday but can re-arrange my schedule as necessary.

Thank you and best regards,

Heather R. Pinney
